## Summary

Aspiring Software Developer with hands-on experience in web development using React and Next.js and mobile app development using React Native. Actively working on real-world projects involving API integration and application workflows, with strong problem-solving skills and a continuous learning mindset.

## Education

SPPU University (**Sinhgad College of Engineering**), BE in E&TC

Expected Graduation: June 2027

CGPA: 8.38/10.0

Class 10<sup>th</sup> (**Dnyaneshwar High School, Latur**): 86.86 % | Class 12<sup>th</sup> (**Dayanand Science College, Latur**): 62 %

## Technical Skills

**Languages:** Java, C++, Python, JavaScript, TypeScript.

**Development Technologies:** React.js, Next.js, React Native (Expo), Node.js, Express.js.

**Cloud:** Google Cloud Platform (Hands-on Labs).

**Databases:** MySQL, MongoDB, Supabase.

**Tools & Version Control:** Git, GitHub, VS Code.

**Core Skills:** Problem Solving, Team Collaboration, Communication, Leadership, Workflow Management, DSA, OOPS, DBMS Basics.

## Experience

**Software Development & Project Coordination Intern- Shinnovation Co.** (Pune, India)

Jan 2026

- Developed and maintained a mobile application using React Native and collaborated with backend teams to ensure smooth application workflows and performance.
- Coordinated with team members and project stakeholders to manage tasks, resolve technical issues, and track project progress effectively.
- Assisted in debugging, deployment, APK generation, and application configuration troubleshooting.

**Web Development and Designing - Oasis InfoByte**

Oct 2025

- Developed responsive web interfaces while collaborating with team members in an agile environment, improving communication, collaboration, and workflow management skills.

## Projects

**Documind AI: Intelligent Document Automation for KMRL**

[Github Link](#)

- Developed a document automation platform for KMRL to streamline document handling and improve workflow efficiency.
- Built backend workflows for document upload, processing, and secure access using Node.js and Express.js.
- Improved document processing efficiency by reducing manual work and enhancing data management workflows.

**Smart Crop Disease Detection and Prevention System**

[Github Link](#)

- Developed a smart crop monitoring platform with real-time dashboards and user interaction features.
- Collaborated on integrating AI-based prediction systems and secure user authentication features.
- Improved user accessibility through responsive frontend design and application workflows.

**Retinal Disease Prediction & Analysis Platform**

[Github Link](#)

- Developed an AI-powered healthcare analysis platform with image upload and real-time dashboard features.
- Worked on frontend workflows, data visualization, and improving user interaction within the platform.

## Achievements and Certifications

- Demonstrated leadership, teamwork, and problem-solving skills through participation in multiple national-level hackathons and collaborative projects.
- Postman API Fundamentals Students Expert Certification- [Certificate Link](#)
- Completed Google Cloud Skills Boost hands-on labs, gaining practical experience with GCP services.
